

# INDOOR WIRELESS HOTSPOTS WITH CAPTIVE PORTAL

Feature	Surf Easy Indoor Basic	Surf Easy Indoor Standard	Surf Easy Indoor Extreme	Surf Easy 3G Hotspot	Surf Easy Advertiser
					
<b>Description</b>					
<b>Suitability</b>	Best suited to small locations with about 40m coverage distance, such as cafes, restaurants, business centres, games rooms, and reception areas.	Provides clear line of sight coverage up to about 30m, making it ideal for function centres, hotel lobbies, and large cafes. Multiple units can be deployed to cover larger areas or multiple storey buildings.	A very powerful indoor hotspot that is ideal for larger areas or sites that want multiple LAN ports for cabled access. Transmits through walls, and usually through one floor above or below.	Suited to locations that need to run on a 3G or 4G wireless connection. Simply insert your Telstra or 3Mobile SIM card and have a truly mobile hotspot that can run just about anywhere.	Want a digital advertising system? Give your guests free internet access with an advertising based system. Every new user gets a set amount of access that resets at regular intervals.
<b>Overview</b>	All Surf Easy hotspots are commercial grade systems, best suited to businesses with one or more small locations that want detailed reporting, easy user management, remote configuration, rebranded logon and billing pages, and the ability to allow users to roam between their locations with one account. They also support credit card billing.				Show digital advertising to laptop and mobile users.
